About this Document

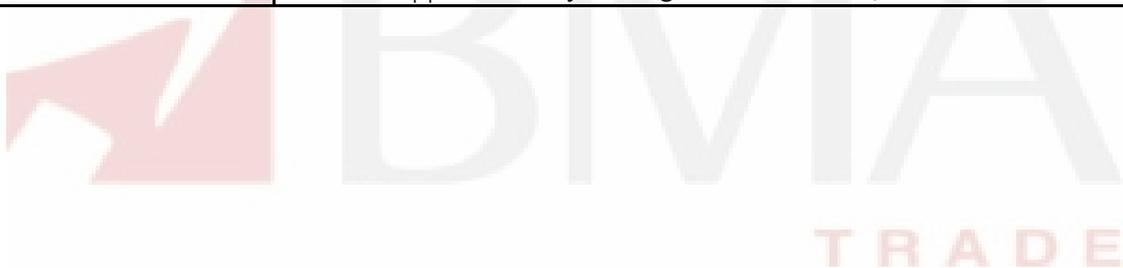

This document is about the features and functionality of Trading Terminal through which a user can place orders and view current market stats in real time. It intends to guide the user of the application about all views and windows available so that he/she can use it effectively. The document discusses different types of views available in the application as well as different customization options to customize these views according to user preferences.

Audience

As this document is all about the features and usage of online trading terminal, it is intended for all users of Online Trading.

Conventions

CONVENTION / STYLE	Purpose
Bold	Name of application objects, e.g. menus, screens, buttons etc.

Introduction

Trading Terminal is an online trading application that offers the ability to buy and sell shares and view real time stock information. Trading Terminal client is installed on the system. This client gets connected with the Trading Server. Trading Server has different components running. A main component is Message Server which is connected with a Trading Engine. Trading Engine is responsible for executing trades. Other server side components are Feed Server, Feed Reader, SubFeed Server, FIXGateway etc. These components are responsible for various server side operations. This manual covers client portion of the Terminal only. This Terminal (client) offers a variety of different useful menu options to facilitate sale/purchase and manage client information efficiently.

Trading Terminal provides following advanced features:

Different perspectives named Banking, Charts, Research, Social and Trading are available which provide user interface for different views and operations.

All basic views and operations are available in Trading Perspective. In this perspective current market statistics for different stocks are available. This perspective also provides exchange metrics through a number of watch lists e.g. New Watch List, Index Watch List, Market Watch List and PMEX or NCEL watch list etc. Order book and Trade log views are maintained which keep record of all pending orders and executed trades respectively. A file is also maintained keeping record of all of the current day trades. Buy, Sell, Take, Hit orders can be placed and user can also modify/cancel his/her pending orders. Client margin is checked in real time during order entry, taking into account the client's executed trades and pending orders. Client can view his/her current clearing and overall portfolio positions.

Charts perspective provides different stocks and exchange statistics. Advanced charting module is provided containing Symbol and Index graphs.

All of the views can be customized according to user preferences and the customizations persist even after exit from the application and are restored on start up.

1 Definitional

Getting Started:

Navigation:

Start Menu > Programs > BMA Trading Terminal > Trading Terminal.Ink

By default, Trading Terminal is installed in Start Menu > Programs > BMA Trading Terminal folder of start menu. Start Menu > Programs > BMA Trading Terminal > config.ini file contains some configuration parameters that are appropriate when application is installed. These can be modified later if required.

On start up, Terminal gets connected with the Trading Server. In case, if it fails to connect with the Server, following message appears. The connection may fail due to having temporary Server shutdown or some communication channel failures.

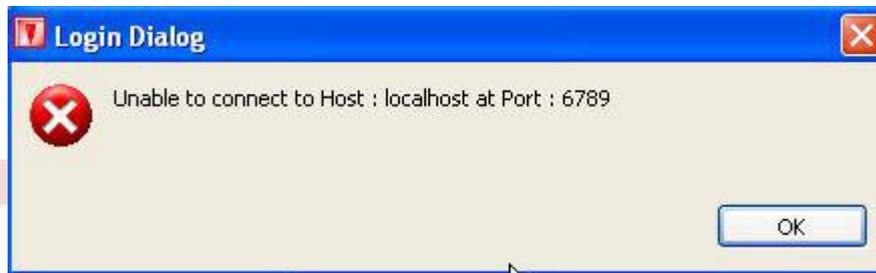

Figure 1: Connection Failed

1.1 Login

1.1.1 Login – Login Window

Navigation:

Start Menu > Programs > BMA Trading Terminal > Trading Terminal.Ink

Each application user is provided with a unique user name and password. Each user has a particular user type that determines the level of access a user has to the application. There are three types of users:

Trader has full access to all of the views (except Portfolio View) and can place orders on behalf of different clients associated with the trader.

Client also has full access to all of the views (including Portfolio View) but can place orders on behalf of him/her only.

Subscriber has limited access to the application. Order related views and functionality is not available for this type of user while all other views are available.

For application login,

Login – Login Window (cont.)

Enter user ID in the User Id field.

Enter password in the Password field.

Press the ENTER key or click OK button.

Figure 2: Login Window

Screen Explanation

Field	Function
User Id	User Id of the user
Password	Password of the user
Save Password	If checked saved password for next logon

1.1.2 Invalid User Id / Password

Navigation

Start Menu > Start Menu > Programs > BMA Trading Terminal > Trading Terminal.lnk

Give user name and password. Invalid user id of password screen is displayed in case of invalid user id or password.

Figure 3: Invalid User Id or Password

1.2 Application Startup

Navigation:

Start Menu > Programs > BMA Trading Terminal > Trading Terminal.Ink

Give valid user id and password. On successful logon this screen is displayed.

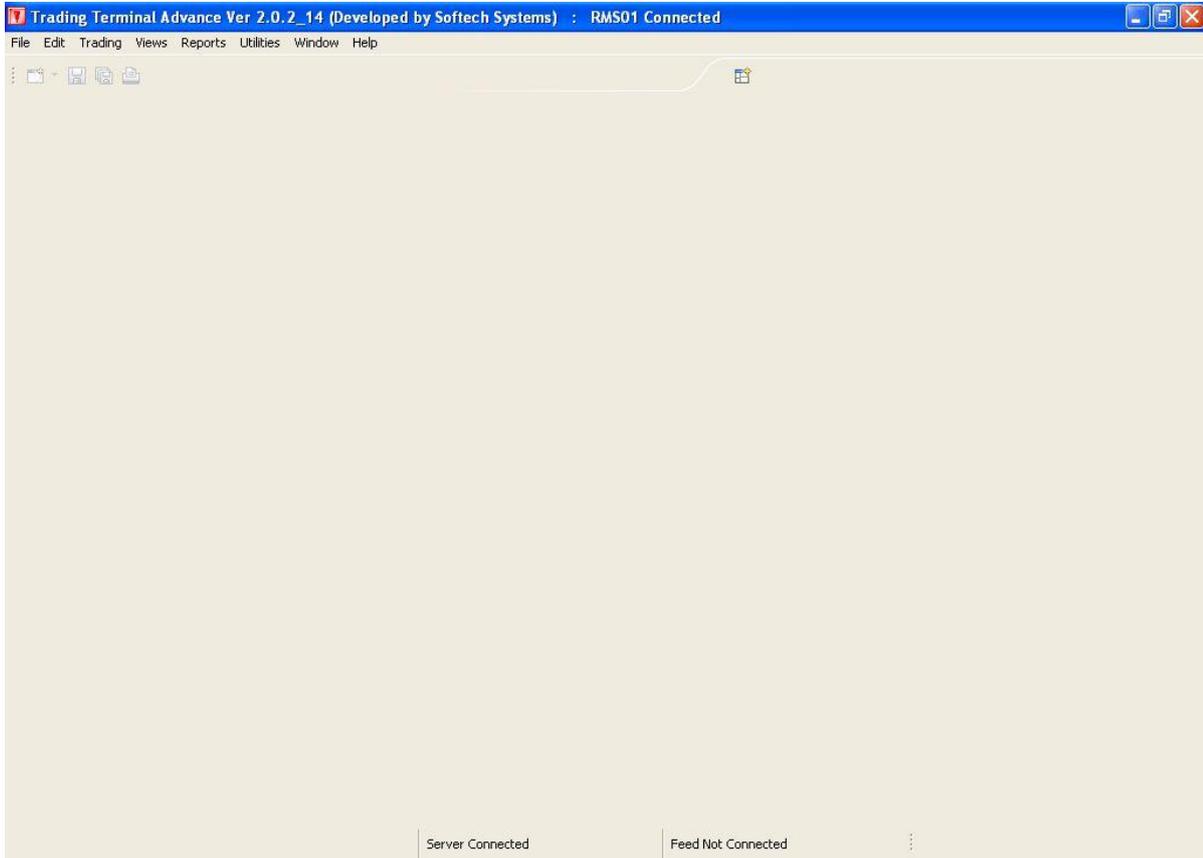

Figure 4: Terminal screen on successful logon

1.2.1 Application Startup – Perspective Selection

Navigation:

Start Menu > Programs > BMA Trading Terminal > Trading Terminal.Ink

Give user id and password. On successful logon, terminal screen appears.

Click on the icon encircled in red in the figure 4, select **Other** and then select **Trading Perspective** from the popup window.

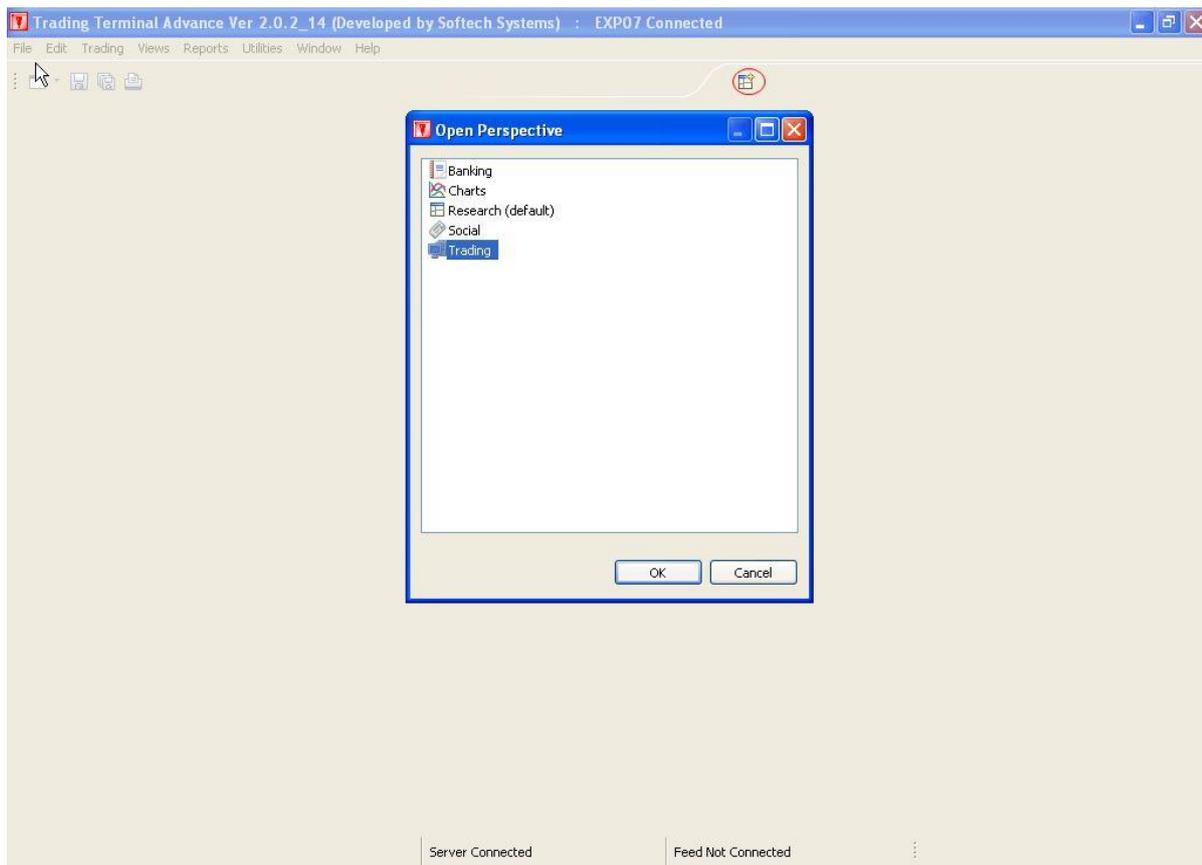

Figure 5: Selecting Trading Perspective

Application Startup – Perspective Selection (cont.)

Following screen appears.

PSMC	0.00	0.00 (0.00%)								13:56:43	

Figure 10: My Watch List

1.3.2 File Menu – Export

Navigation:

File > Export

This option exports the chart data or Trade log on to a specified file.

Following popup dialog appears.

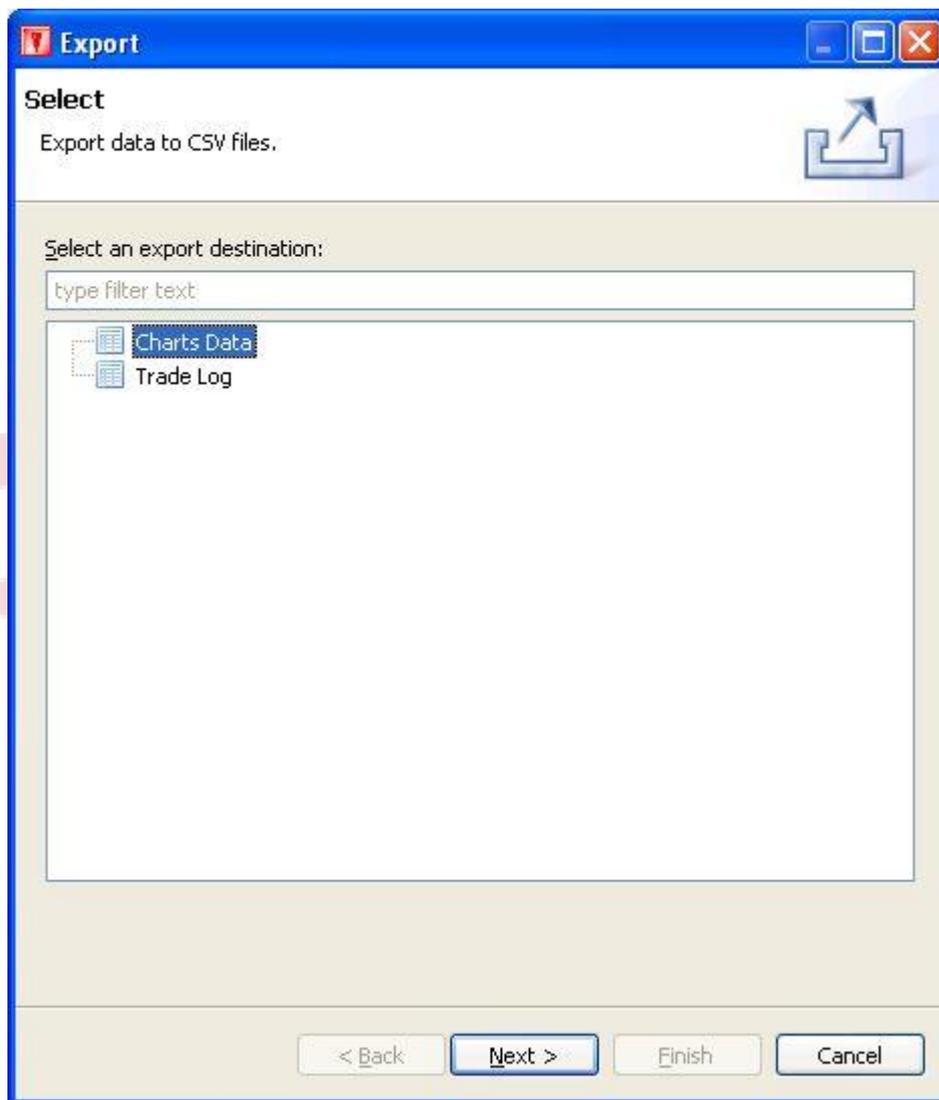

Figure 11: Export Dialog

To export charts data click on Charts Data in the dialog. Click next.

File Menu – Export (cont.)

Following screen appears

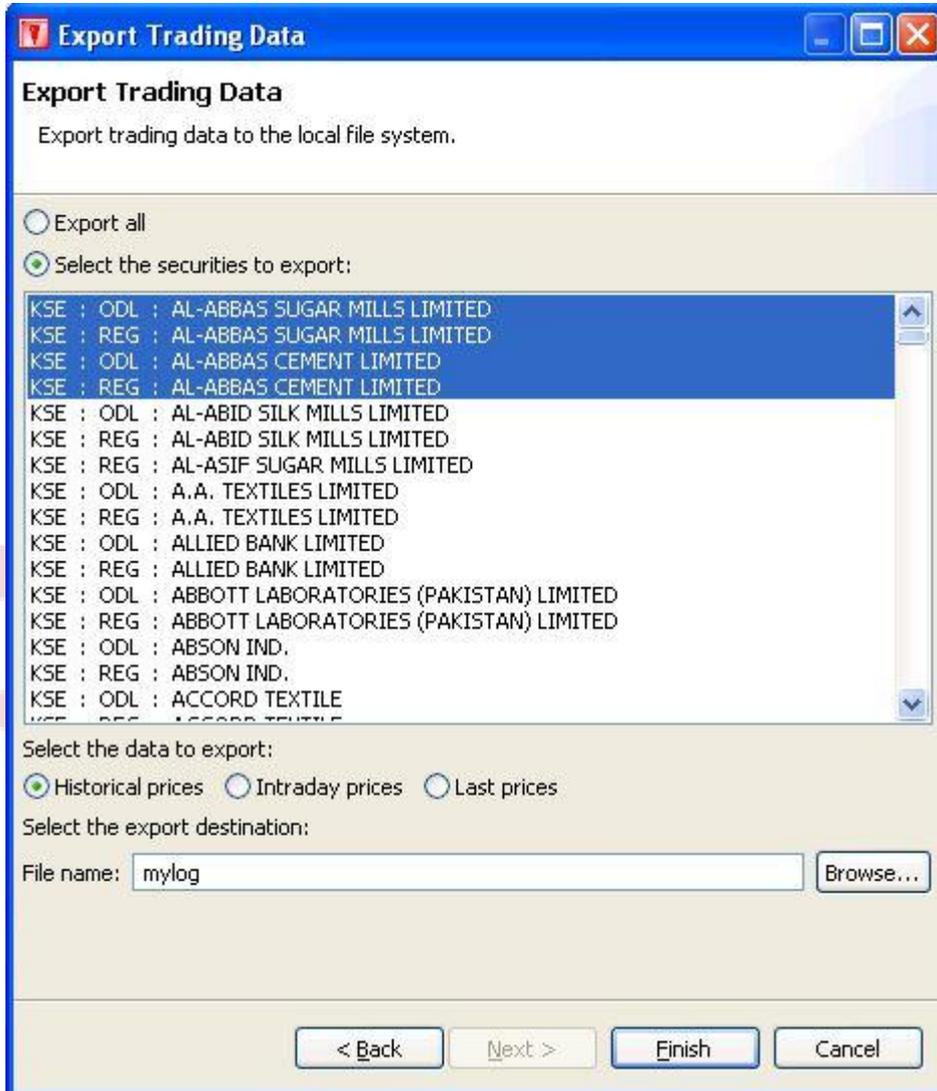

Figure 12: Export Dialog

Click on “Export all” combo box to export all securities. To export a selected list of securities, select “Select the securities to export”. Highlight the securities to export. For historical prices select “Historical prices” combo, whereas select “Intraday prices” to select intraday price, whereas select “Last prices” to select last prices. Click browse specify location and give the filename. Click finish. Open the exported file to check the data.

File Menu – Export (cont.)

To export Trade Log select “Trade Log” from the export dialog. Click Next.

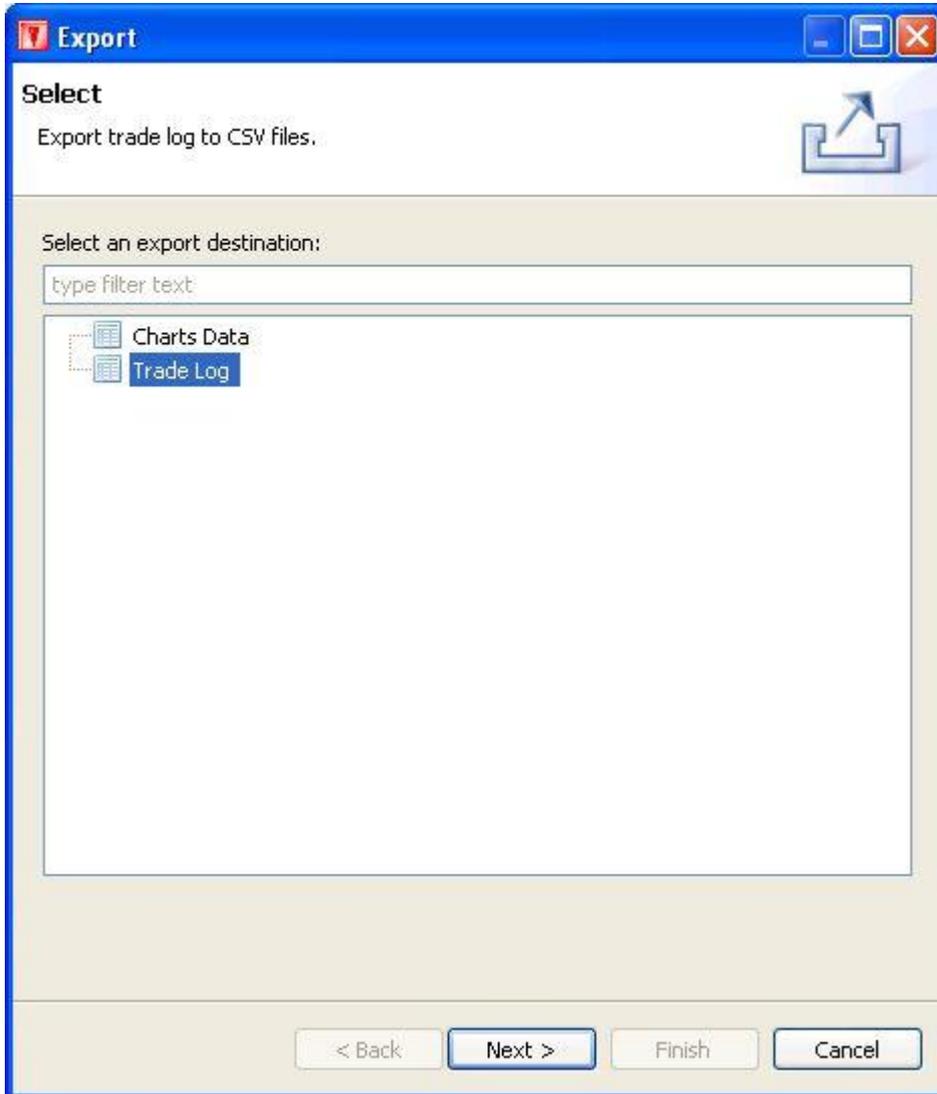

Figure 13: Export Dialog

File Menu – Export (cont.)

Following screen appears.

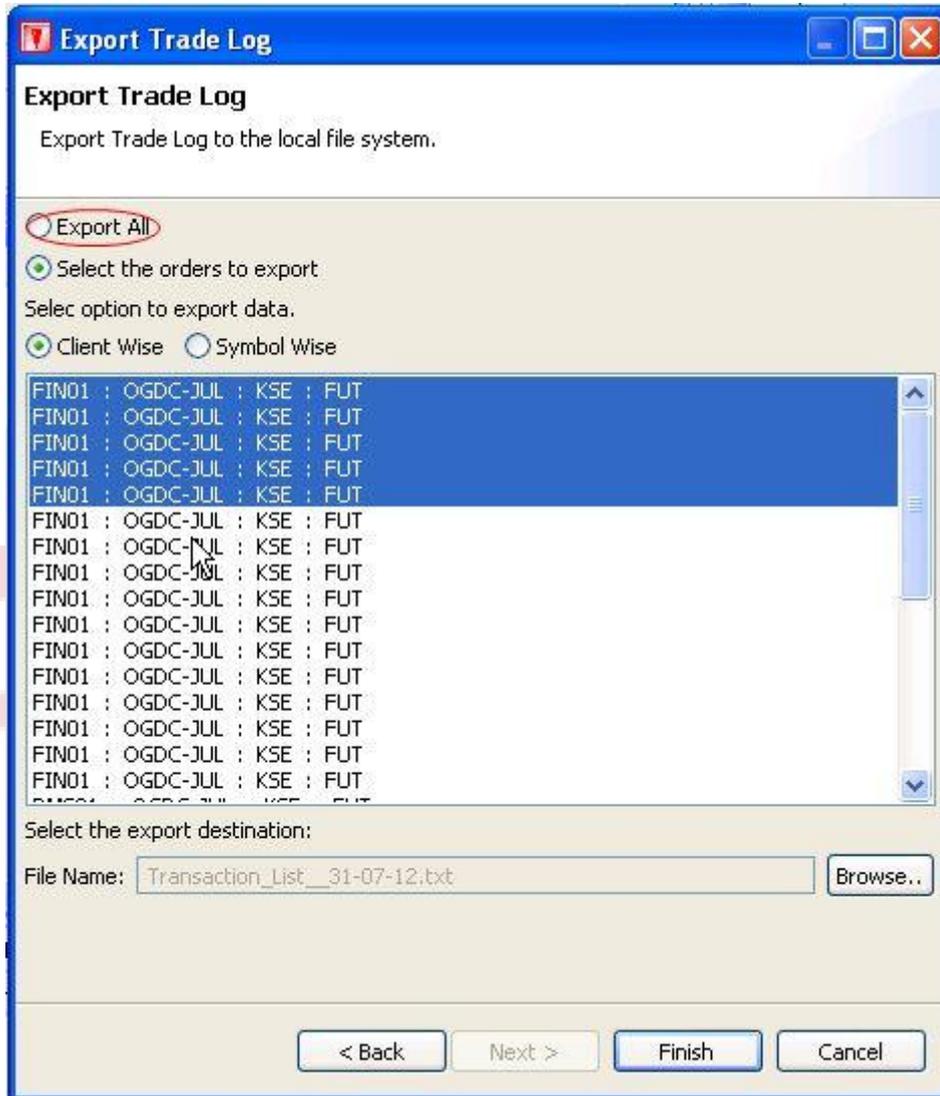

Figure 14: Export Dialog

Select "Export All" encircled in red to export all securities. Whereas to export selected orders select "Select the orders to export". Highlight the orders to export. Select option to export data i.e. "Client Wise" or "Symbol Wise". Click on browse and give the filename. Click finish to export the log.

1.4 Watch Lists Menu

Most of the Watch Lists are stock feed based and have similar customization options. User can choose symbols to be shown in the Watch List. User can select different columns to be shown on the Watch List from a list of columns and can also arrange these columns in some desired order. User's current settings for different view attributes, layout and positioning are saved on application exit and persist even after application has been closed. These settings are restored next time application is started.

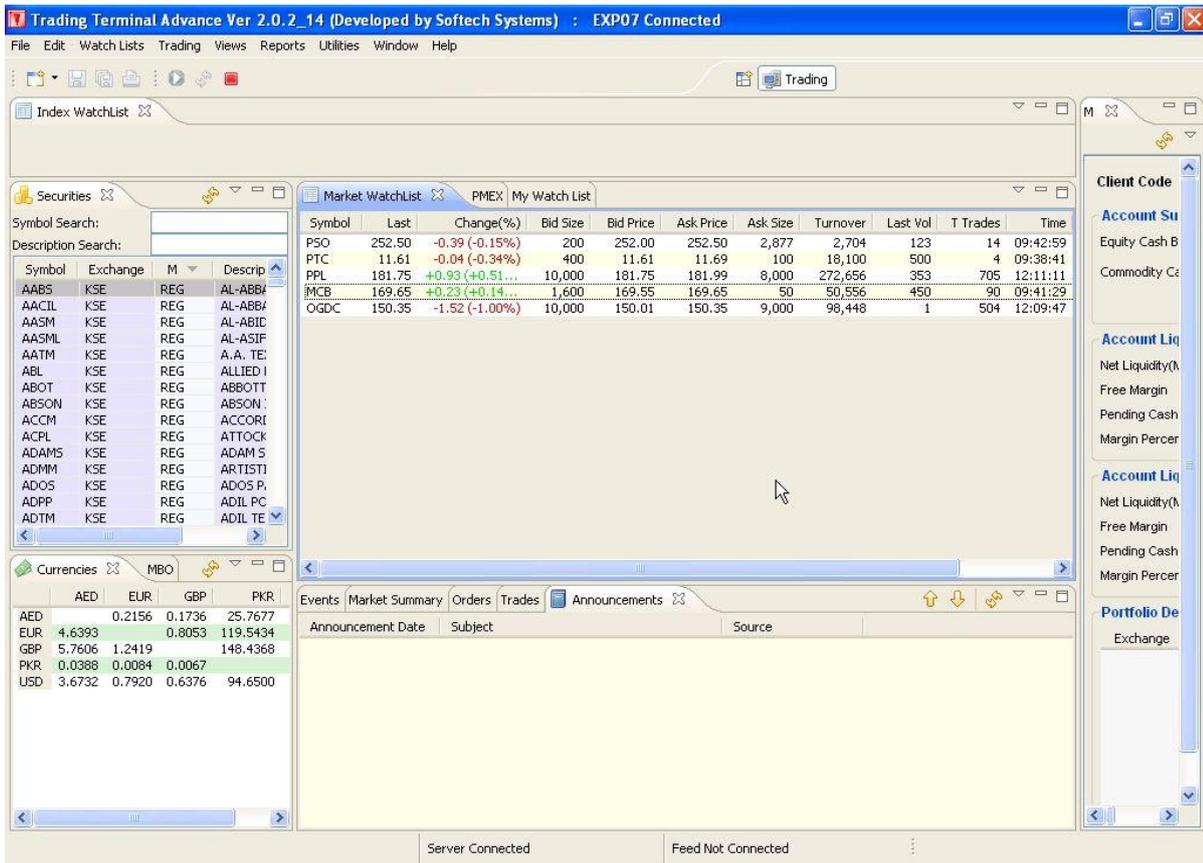

Figure 15: Watch Lists Menu

1.4.1 Watch Lists Menu – New Watch List

Navigation:

Watch Lists Menu > New Watch List

New watch list is same as File > New Wizard > New Watch List. For details refer to File Menu - New Wizard – New Watch List. Details are explained in 1.3.1.

1.4.2 Watch Lists Menu – Index Watch List

Navigation:

Watch Lists Menu > Index Watch List

Drag and drop securities from the Market Watch List onto the Watch List.

Symbol	Last	Change	Change(%)
KSE.PSO(REG)	2,704	-0.39	-0.15%

1.8 Help Menu

1.8.1 Help Menu – Install New Software

Navigation:

Help > Install New Software

Terminal provides a feature to update existing software from the terminal website. Install New Software is one time effort and is not required if it is already configured.

In order to download software updates, you have to verify the Auto Update Server URL (<http://www.serverurl.com/updatesite/>) is configured in your software. At the place of serverurl give URL of the server where updates are available.

Click on work “Work with the list of software sites”.

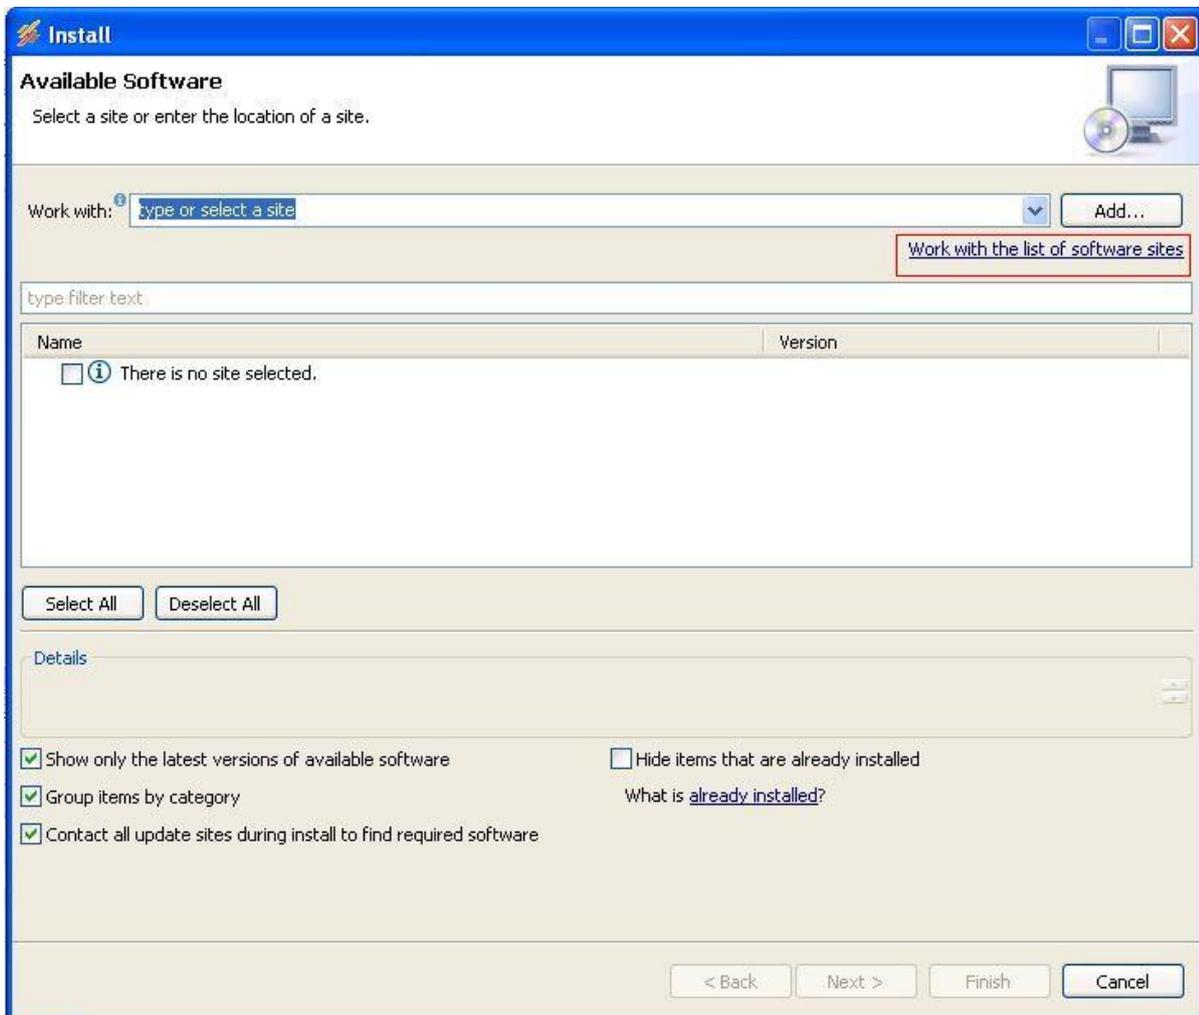

Figure 56: Install New Software

Help Menu – Install New Software

Following window appears.

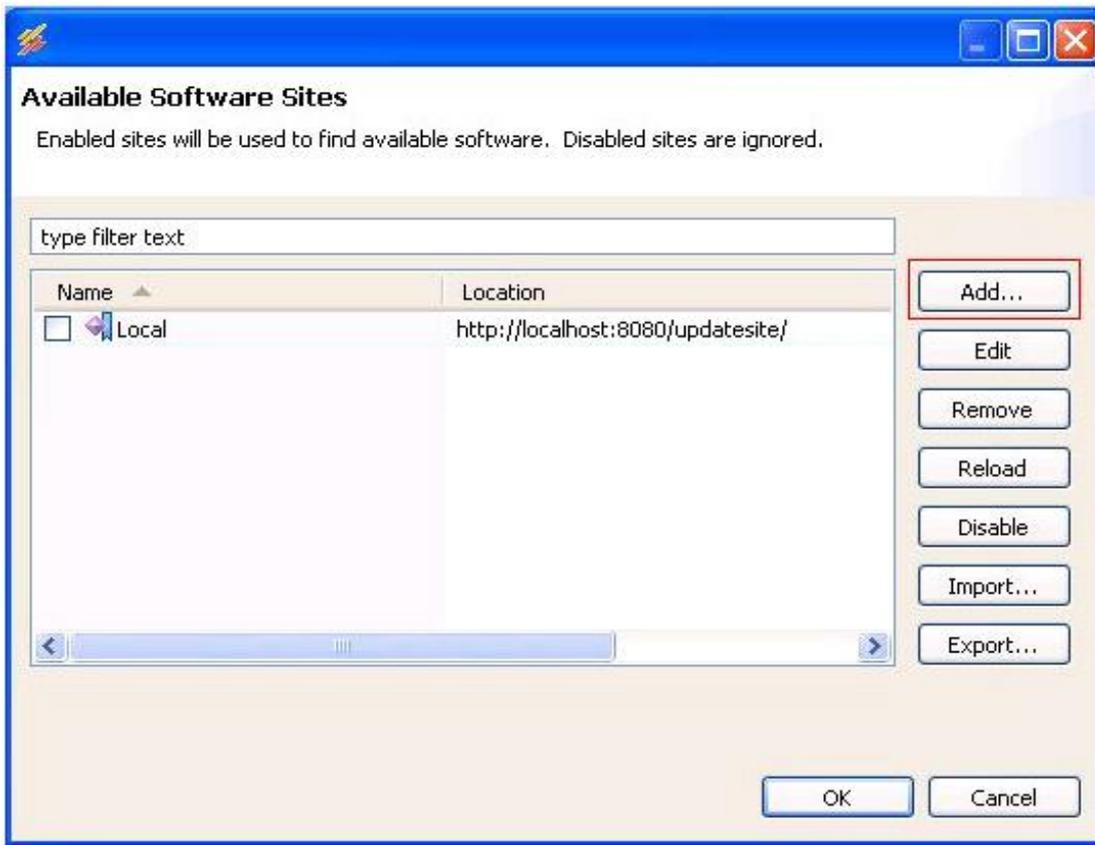

Figure 57: Add Software Site

Click on "Add" button to add new software site or click on edit button to edit existing software site. Following window appears when you click on "Add" button.

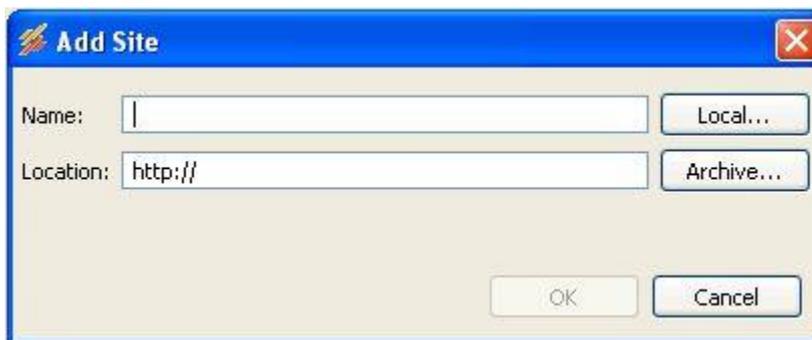

Figure 58: Install New Software

Screen Explanation

Checkbox or Field	Function
Name	Give name for the software site
Location	Give the location of the software site.

Help Menu – Install New Software

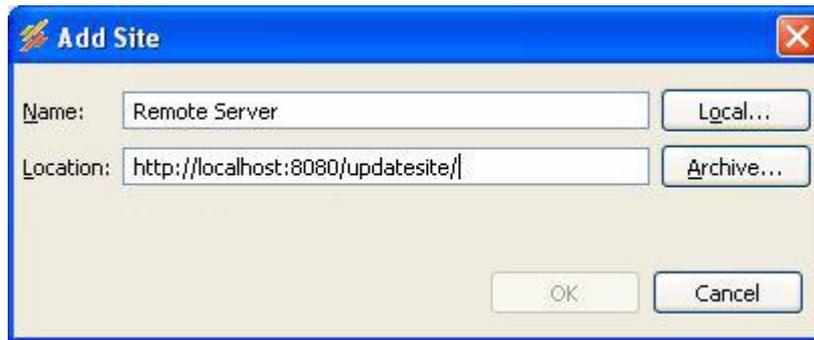

Figure 59: Give Update Site Location

After giving information press OK button.

If a software site is updated, press reload button. It will check whether the software site is available.

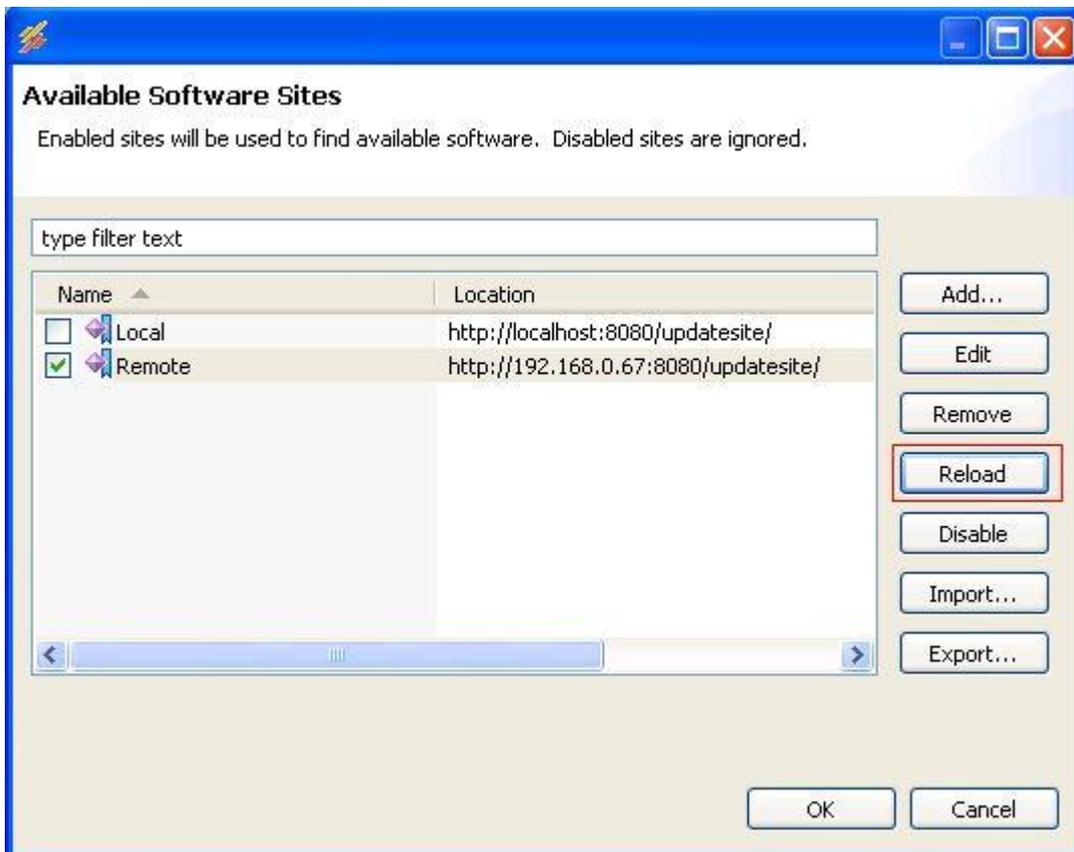

Figure 60: Reloading Software Site

Help Menu – Install New Software

If software site is unavailable following error appears.

Figure 61: Software Site Unavailable

If there is a success message, you have configured the URL and you are ready to download the software updates.

1.8.2 Help Menu – Check for Updates

Navigation:

Help > Check for Updates

If the updates will available then you will see the following view.

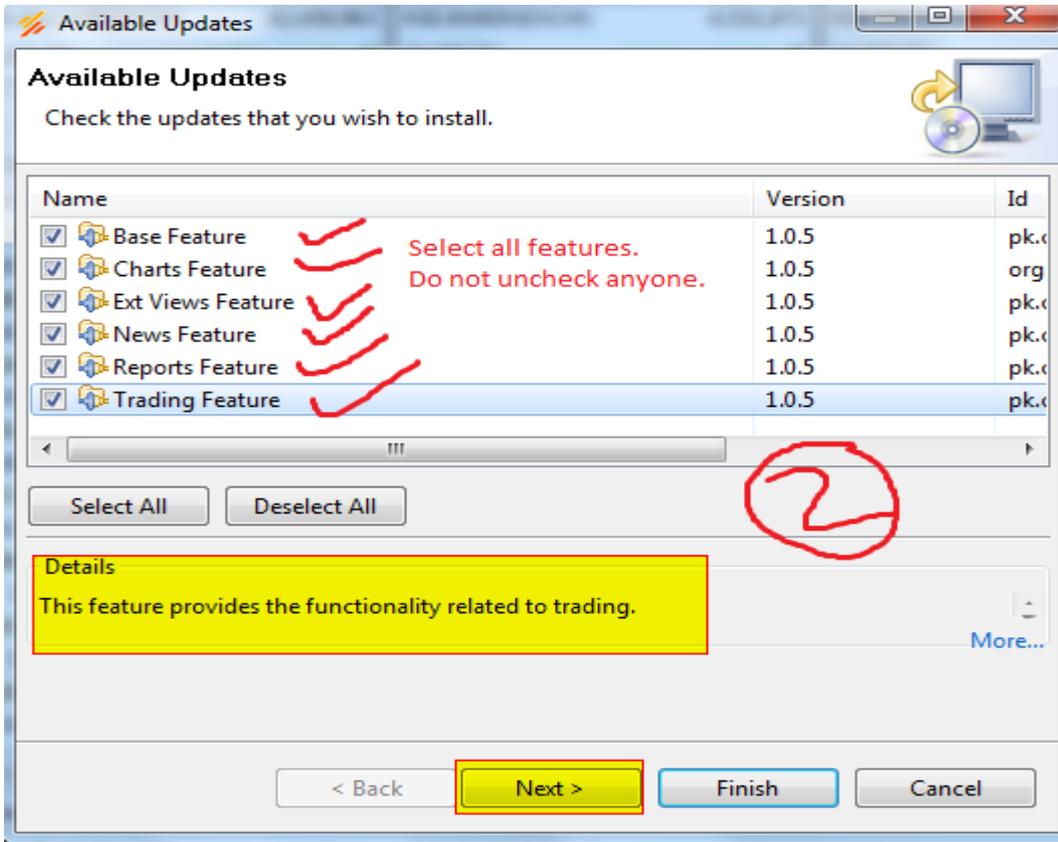

Figure 62: Update Software

Screen Explanation

Checkbox or Field	Function
Base Feature	A terminal feature to be updated
Charts Feature	A terminal feature to be updated
Ext View Feature	A terminal feature to be updated
News Feature	A terminal feature to be updated
Reports Feature	A terminal feature to be updated
Trading Feature	A terminal feature to be updated

Help Menu – Check for Updates (cont.)

Following window appears on pressing “Next” button.

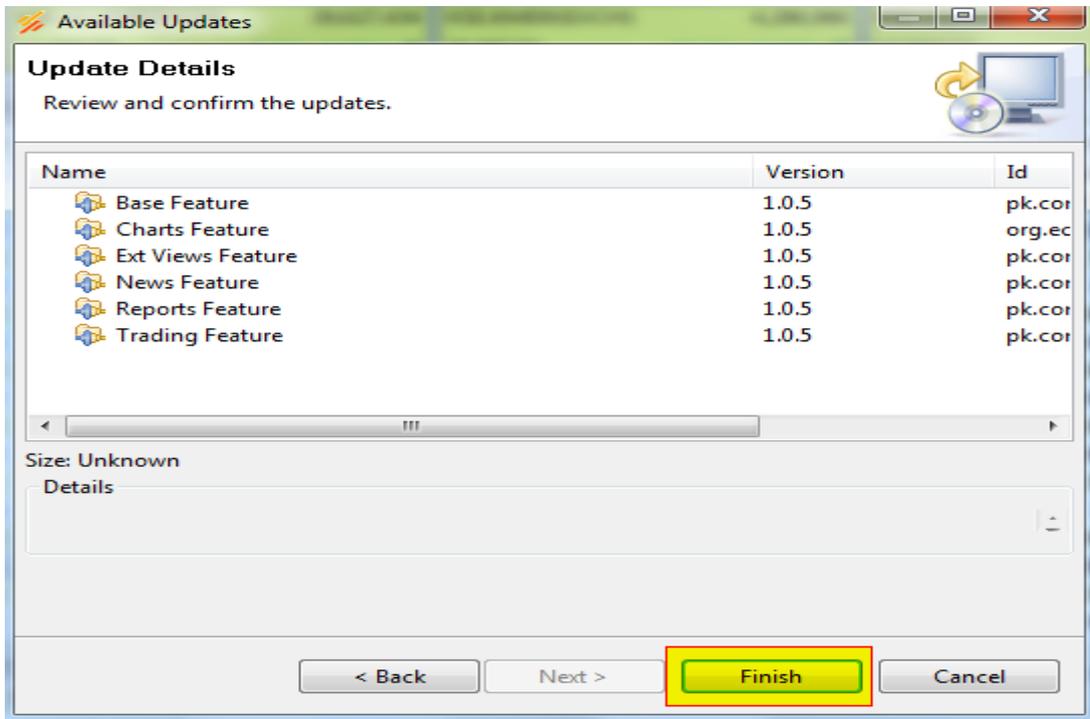

Figure 63: List of New Software Available

Now your software starts downloading updates from server you have configured in previous step.

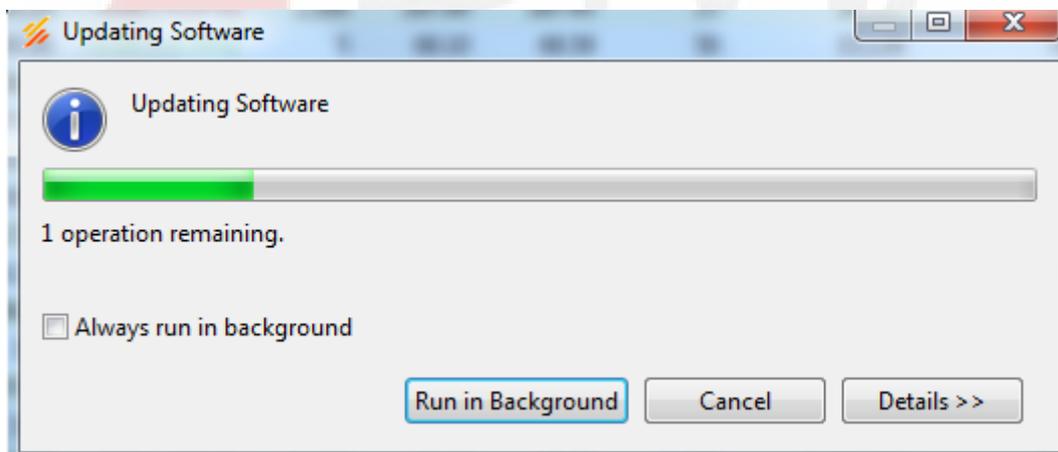

Figure 64: Updating Software

Note: Sometime it shows an error message while downloading the updates due to your internet connection speed but be patient and try it again (Check for updates) because ultimately it will download updates.

After downloading updates it will show warning message. (Just ignore it)

Help Menu – Check for Updates (cont.)

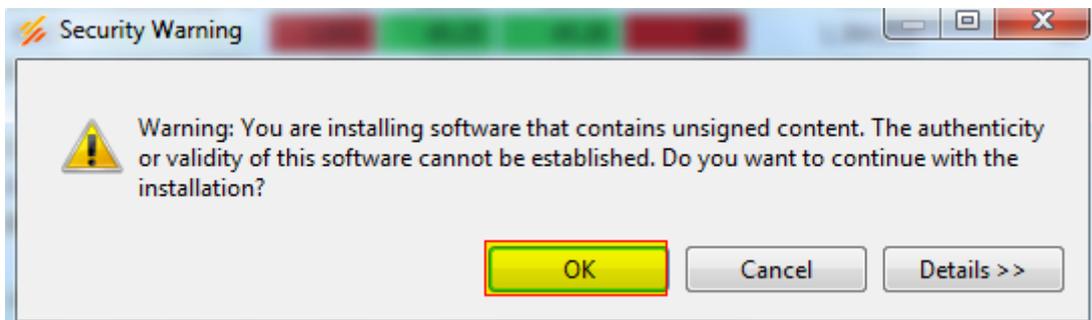

Figure 65: Warning – Unsigned Content

Now your software is updated. You have to restart terminal in order to view changes.

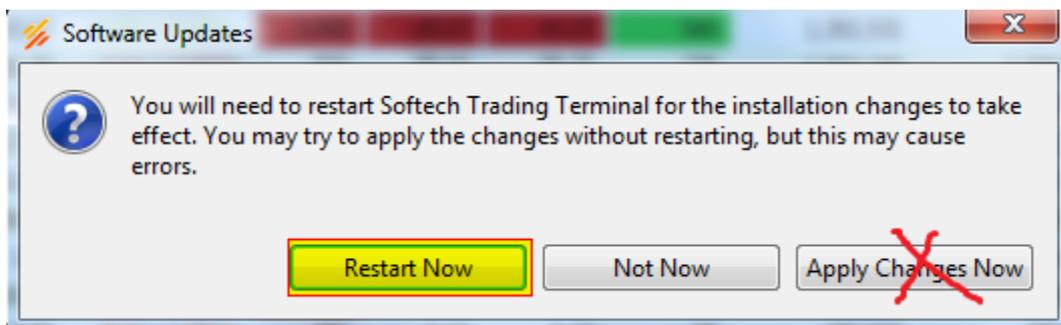

Figure 66: Restart Application

After restarting the terminal, updates will be incorporated in your terminal. To verify it again check for updates, you will see the following message that no updates were found.

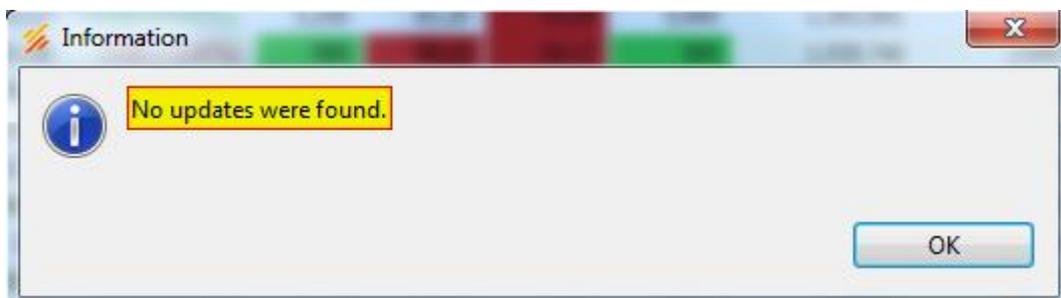

Figure 67: No Updated Available

1.9 Charts Perspective

Navigation:

Open Perspective Button > Others > Charts Perspective

Charts perspective is a complete perspective just like Trading Perspective. It enables user to view different statistics for analysis. Along with the plotting of graphs and charts, there are indicators tools and patterns available for analysis purpose.

Figure 68: Open a Chart

Chart will be displayed. This chart provides price statistics along with time. There is also a bar chart in the bottom that displays volume statistics along with time.

You can change the type of the chart by selecting the line displayed in the line chart. Right click it and click properties. Following popup window appears. Select Type of chart as Line, Bars, Candles or Histogram Area.

Charts Perspective (cont.)

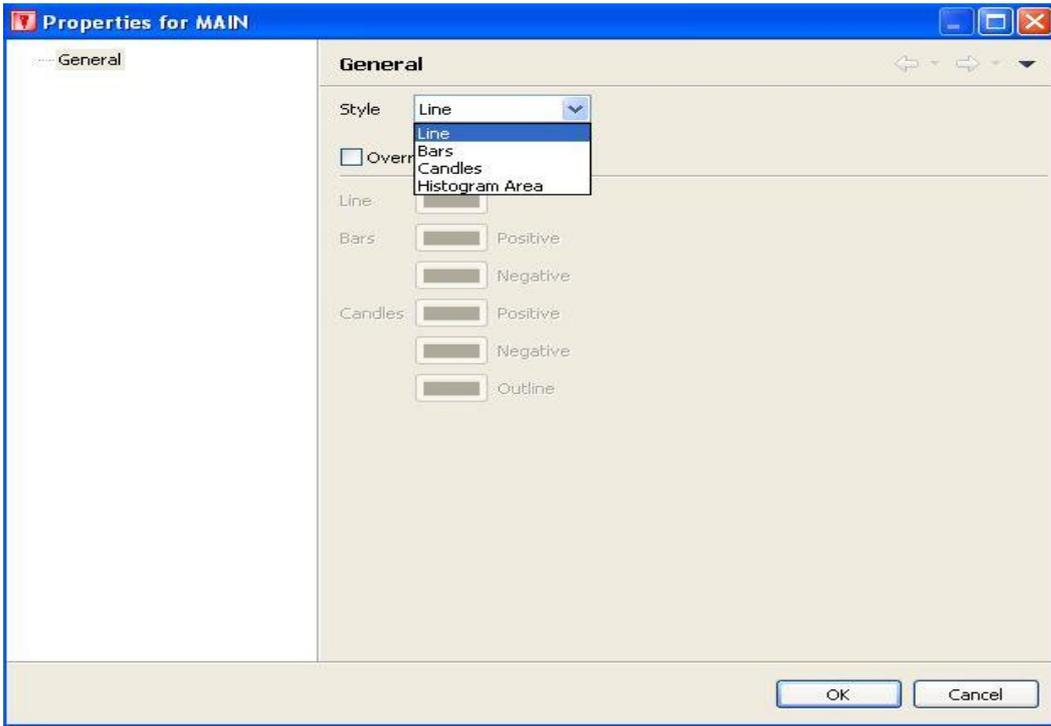

Figure 69: Change Type of Chart

You can also override the color theme by checking “Override color theme” and select color from the color palette for line bars or candles.

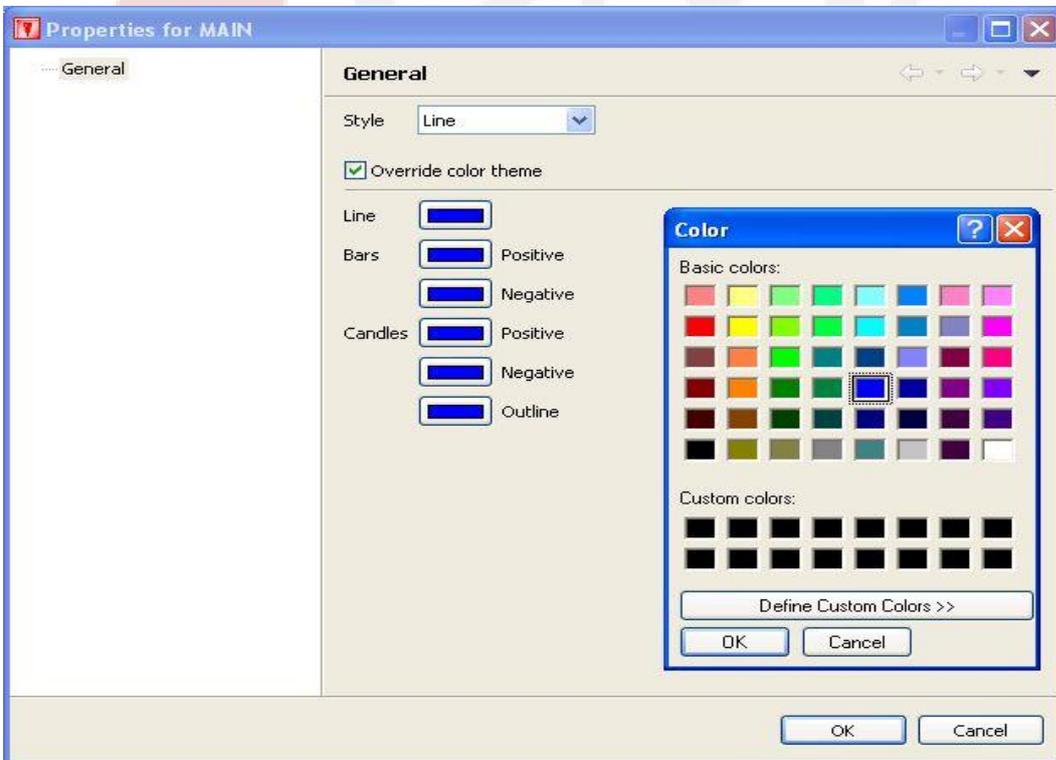

Figure 70: Change Type of Chart

You can view the charts for certain time duration by selecting history chart or intraday chart from the top right of charts view as encircled in the figure 71.

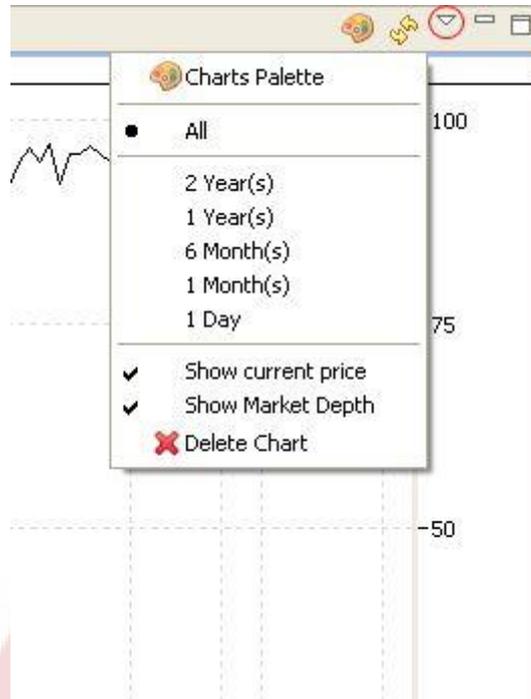

Figure 71: Change Type of Chart

Screen Explanation

Field	Function
All	Shows complete history
2 year	Shows 2 year data
1 year	Shows 1 year data
6 month	Shows 6 month data
1 month	Shows 1 month data
1 day	Show intraday chart
Show current price	Shows current price in the chart
Show Market Depth	Show Market Depth in the chart
Delete Chart	Deletes the chart

1.9.1 Charts Perspective - Top Indicators

Top Indicators provide different statistics as Bollinger Bands, Linear Regression, Moving Average, Trend Channel and Typical Price.

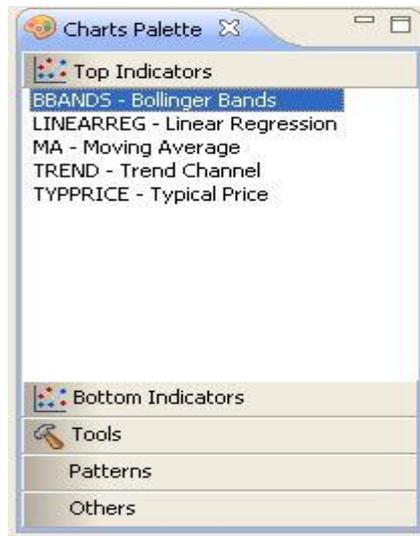

Figure 72: Top Indicators

To view a top indicator click on the indicator from the Charts Palette drag it and drop it onto the Chart view. Following window appears. In figure 72 and figure 73 Bollinger Bands is configured.

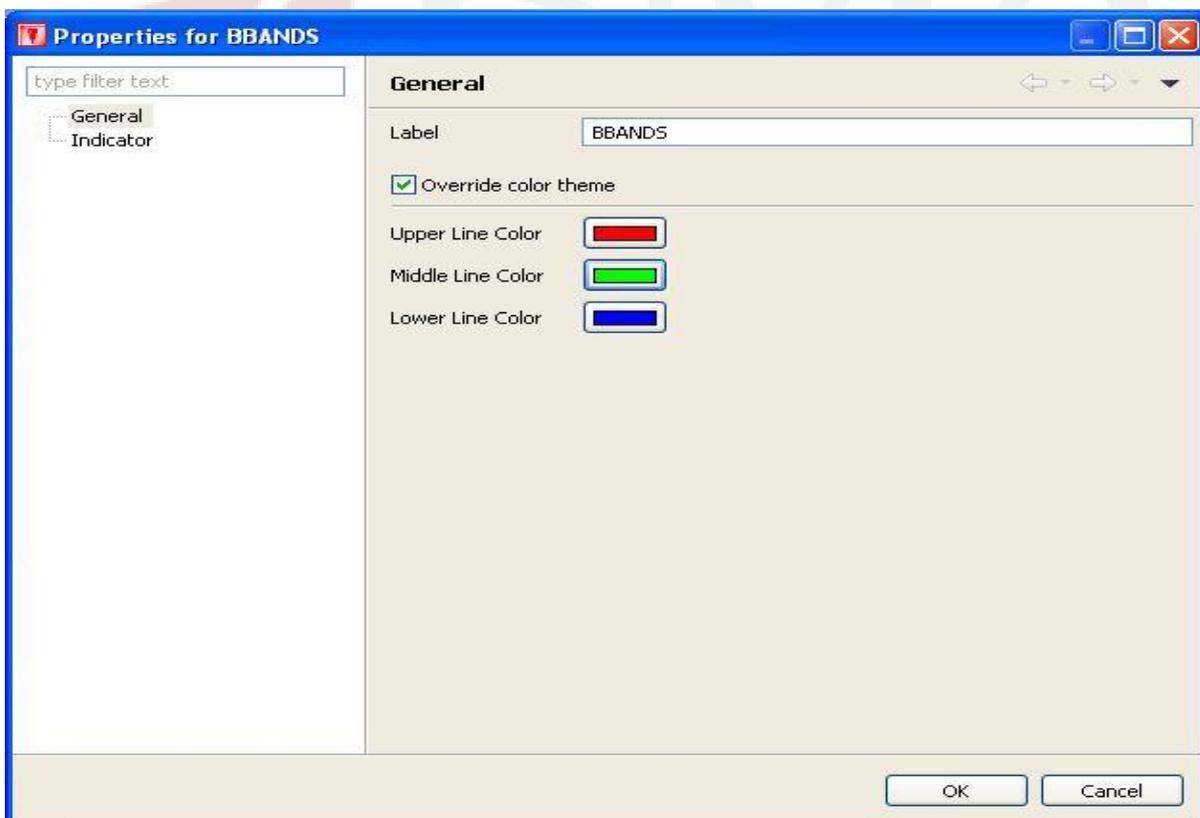

Figure 73: Bollinger Bands - General

Charts Perspective – Top Indicators (cont.)

Provide label in the label field. You can also check the “Override color theme” checkbox if you want to change the color of the chart.

You can also change the indicators by clicking the indicators link from the tree.

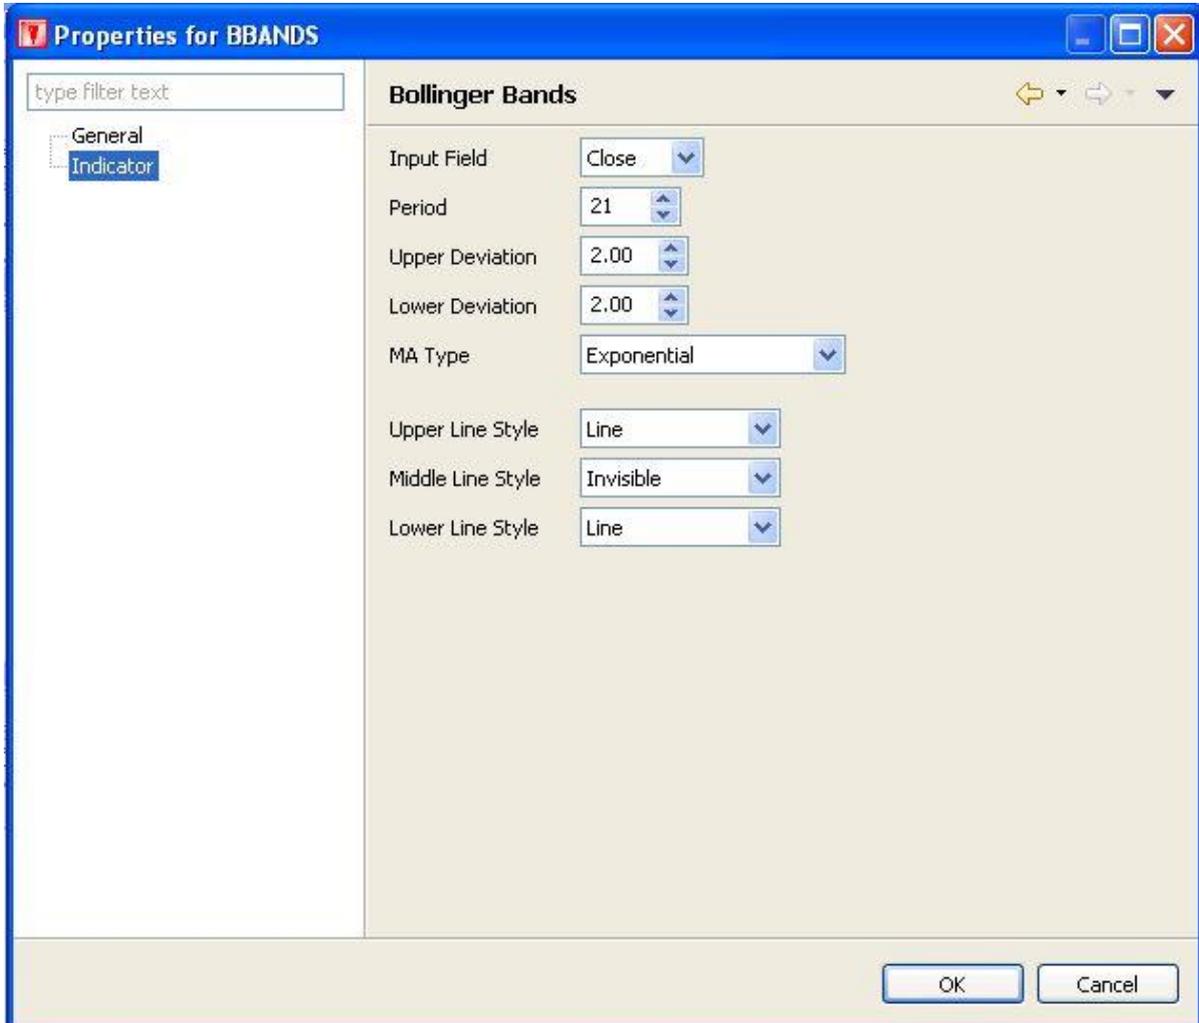

Figure 74: Bollinger Brands Indicators

Screen Explanation

Field	Function
Input Field	Input field can be either Close, High, Low, Open or Volume.
Period	Select the period
Upper Deviation	Select upper deviation
Lower Deviation	Select lower deviation
MA Type	Select MA Type
Upper Line Style	Select upper line style
Middle Line Style	Select middle like style
Lower Line Style	Select lower line style

Charts Perspective – Top Indicators (cont.)

Following chart appears.

Figure 75: Bollinger Bands Indicators

Similarly other Top Indicators like Linear Regression, Moving Average, Trend Channel and Typical Price can be displayed.

1.9.2 Charts Perspective - Bottom Indicators

Bottom Indicators can display different statistics as Chaikin A/D Line, Chaikin A/D Oscillator, A/D Movement Index, etc.

Figure 76: Bottom Indicators

Charts Perspective – Bottom Indicators (cont.)

To view a top indicator click on the indicator from the Charts Palette drag it and drop it onto the Chart view. Following window appears. In figure 77 and figure 78 Chaikin A/D Line is configured and displayed.

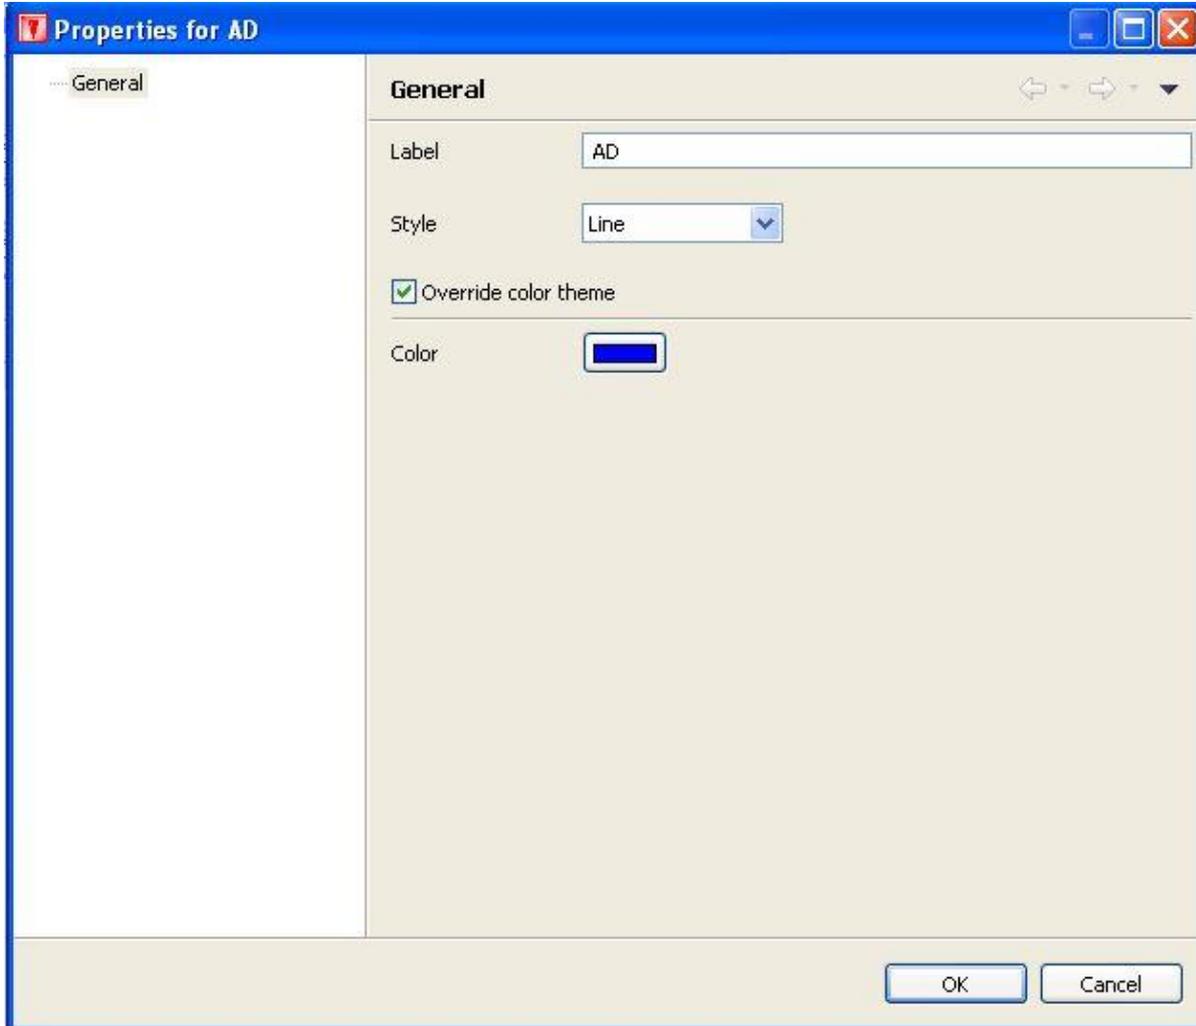

Figure 77: Bottom Indicators

Give the label and Style. Check “Orderride color theme” if you want to change color of the line, and press OK. Following chart appears.

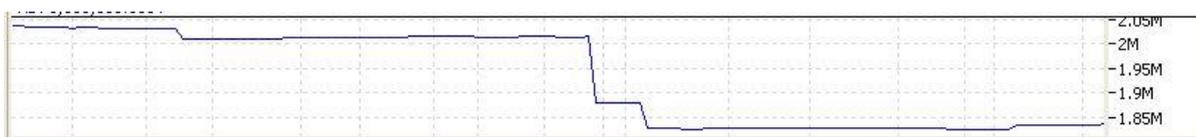

Figure 78: Bottom Indicators

Similarly other Bottom Indicator can be displayed.

1.9.3 Charts Perspective – Tools

FanLine, FiboArc, FiboLine and Line tools are available in the terminal.

To draw a FanLine, drag FanLine from charts palette – tools and drop it onto Charts view. FanLine is displayed in the chart.

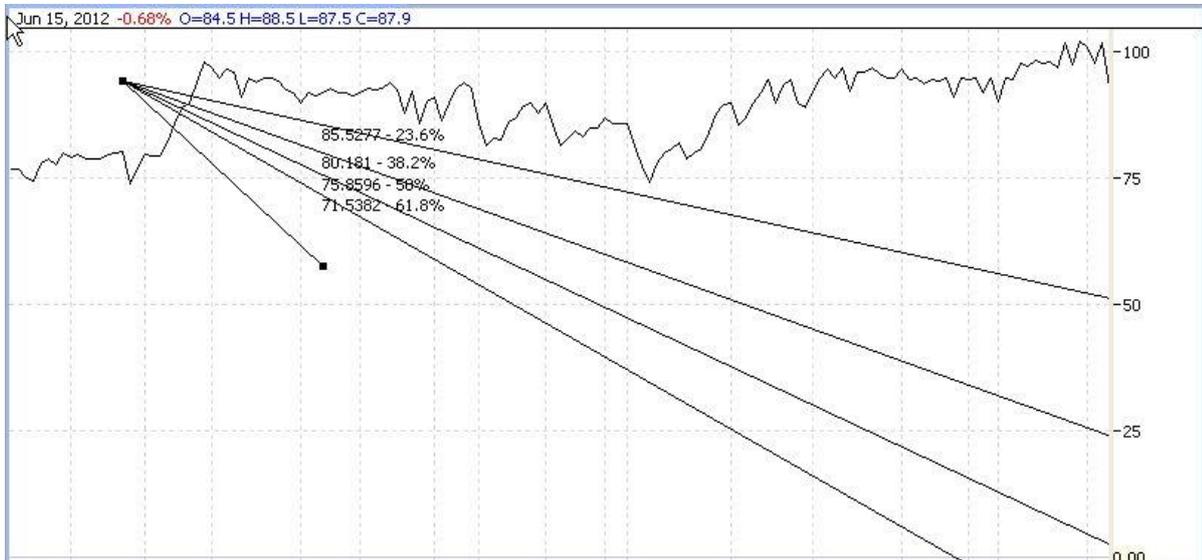

Figure 79: FanLine

To draw a FiboArc, drag FiboArc from charts palette – tools and drop it onto Charts view. FiboArc is displayed in the chart.

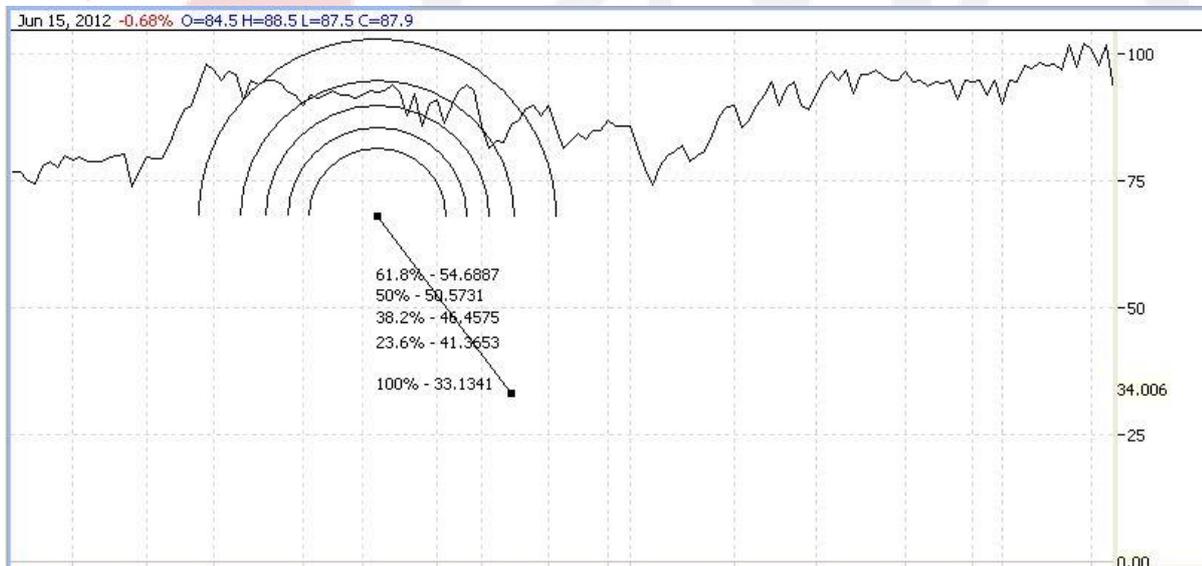

Figure 80: FiboArc

Charts Perspective – Tools (cont.)

To draw a FiboLine, drag FiboLine from charts palette – tools and drop it onto Charts view. FiboLine is displayed in the chart.

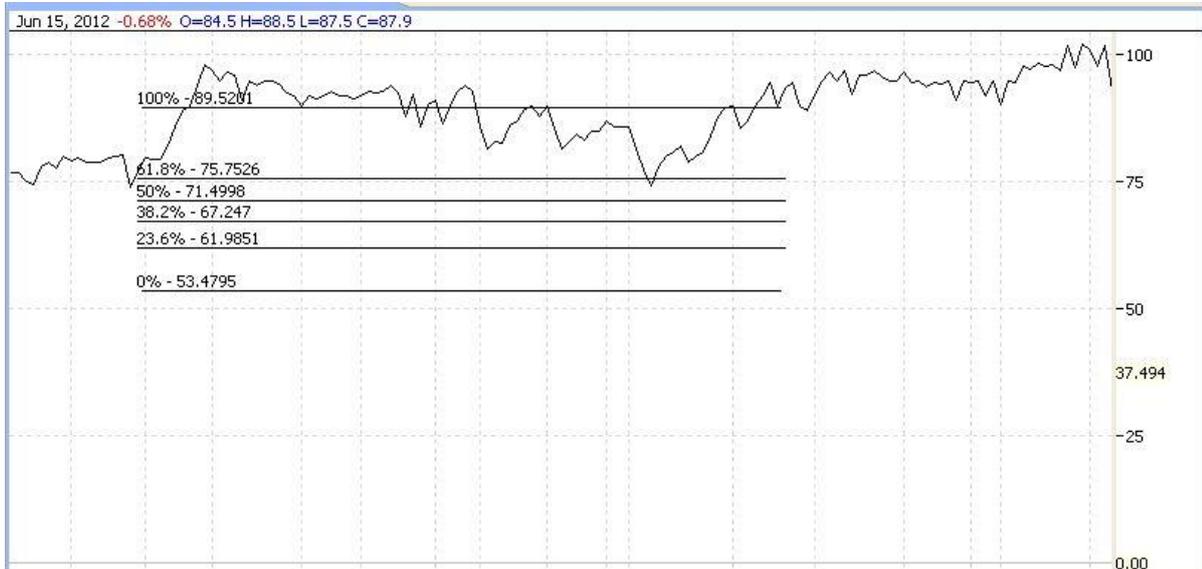

Figure 81: FiboLine

To draw a simple Line, drag Line from charts palette – tools and drop it onto Charts view. Line is displayed in the chart.

Figure 82: FiboLine

1.9.4 Charts Perspective - Patterns

Different Patterns can be displayed by dragging it and dropping it onto the Charts view. Following patterns are available.

Figure 83: Patterns

Charts Perspective – Patterns (cont.)

For example, for viewing Closing Price Reversal drag it and drop it onto the Charts view. It will be displayed as shown in figure 84.

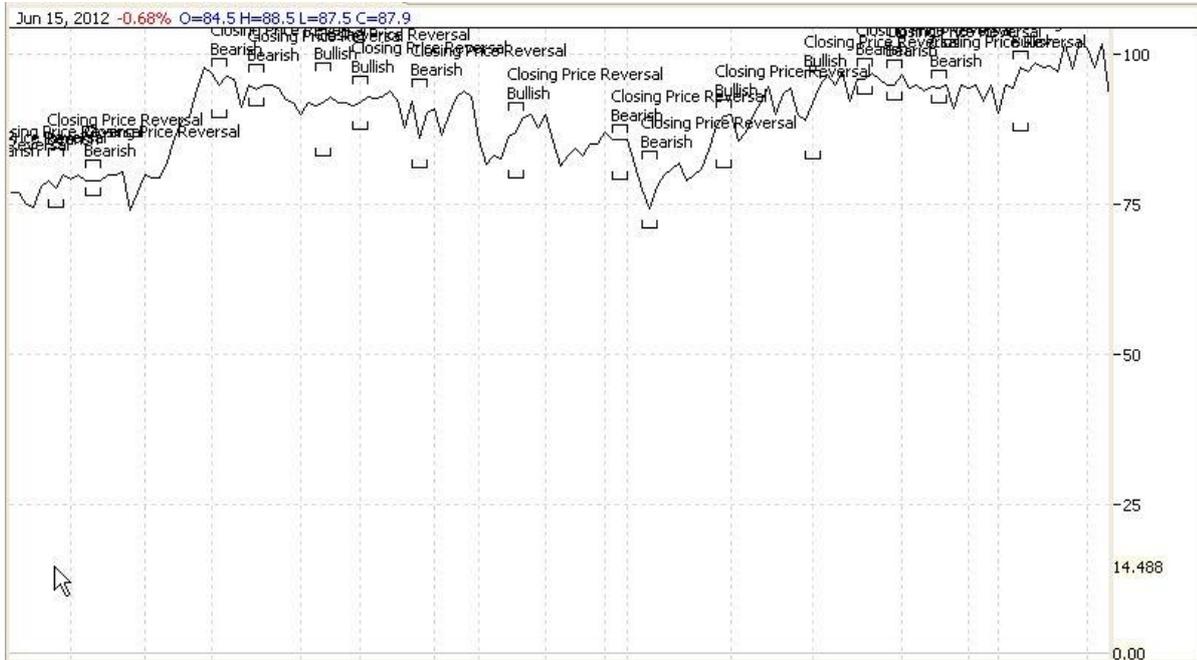

Figure 84: Patterns

1.9.5 Charts Perspective – Others

In others volume can be viewed.

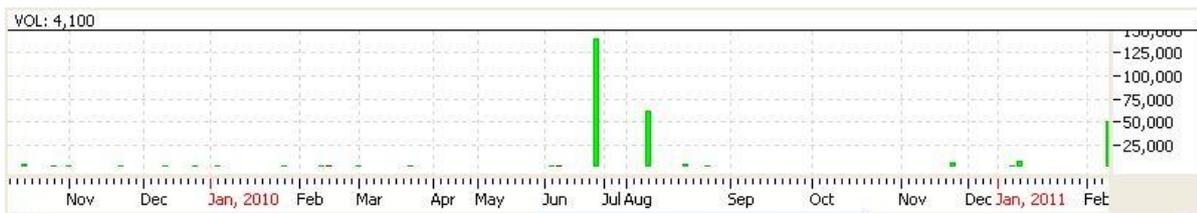

Figure 85: Volume
